Dhaka, Bangladesh

Career Objective

Passionate React Frontend Developer with expertise in JavaScript and modern UI frameworks. Skilled in building responsive, user-friendly web applications with clean, efficient code. Eager to collaborate on innovative projects and enhance user experiences while continuously learning and growing.

Technical Skills

Front-End: HTML5, CSS3, TailwindCSS, JavaScript, React.js

Backend/Database: Node.js, Express.js, REST APIs, MongoDB

Tools: Visual Studio Code, Git, GitHub, Postman, Vercel, Netlify

Projects

Hostel Management System

[Live Demo](#) | [Client](#) | [Server](#)

- Admins can add, update, delete meals, and students can request customized meals via a paid subscription.
- JWT-based authentication ensures persistent login with separate access for admins and students.
- Stripe integration for secure payments and instant data updates across the platform.

Technologies Used: React.js, Node.js, Express.js, JWT Token, MongoDB, Firebase, Stripe

Food Sharing

[Live Demo](#) | [Client](#) | [server](#)

- Users can create, read, update, and delete food items with instant data reflection.
- Private routes secured with JWT enhance security by restricting unauthorized access and protecting user data.
- Sorting and searching features allow quick and efficient discovery of available food items.

Technologies Used: React.js, Node.js, Express.js, JWT Token, MongoDB, Firebase, TanStack Query.

Movie Portal

[Live Demo](#) | [Client](#) | [Server](#)

- Users can add, view, update, and delete movies with genres, ratings, and summaries.
- Users can search by title, sort movies efficiently, and showcase top-rated ones on the homepage.
- Secure access is ensured with Firebase authentication, including Google social login for quick sign-in.

Technologies Used: React.js, Node.js, Express.js, JWT Token, MongoDB, Firebase, Swiper.js

Certifications

- Complete Web Development - (July 2024 - January 2025)

Languages

- Bangla (Native)
- English (Professional Fluency)
